

Market Comment

Total Requirements for the 12 month period ending April 2016 were 337.17 kg BF. This figure represents a 0.2% decrease compared to last month but a 3.2% increase over April 2015. While long-term demand continues to experience growth, the Total Requirements are expected to slow down towards the end of the 2015-2016 dairy year.

BF utilization for cream has sustained its strong growth with a 6.8% increase for the 12 months ending April 2016 compared to the same period one year ago. BF used in fluid milk has also increased by 1.5% (equivalent to 700,000 kg BF) on a twelve month rolling basis. BF utilization for yogurt and ice cream also remains strong. Class 3(d) continues to see large increase in BF usage, representing an increase of more than 2.5 M. kg BF over the last 12 months. Butter processing remains strong which is evident by the high 4(a) butterfat utilization and the rapid rebuilding of processor stocks.

Comments on Stocks

Total milk production for the 12 month period ending April 2016 was 4.9% higher than the same period last year. A significant amount of this milk has been used to re-build butter stocks and fill domestic market requirements.

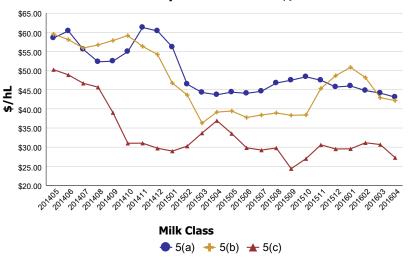

As of April 30, 2016, the CDC's Plan A butter stocks were 12 tonnes while Plan B amounted to 6,198 tonnes. Supplementary butter imports for April 2016 were 459 tonnes. The first CDC supplementary import permit expired in April 2016. Since May 2016, the CDC has continued to import butter under its second permit granted by Global Affairs Canada.
