Dairy research: innovation, expertise, and up-and-coming researchers

The theme of the biannual symposium of the STELA Research Centre, held from May 30-31, 2005 at the Château Bonne Entente in Québec City, was Dairy research: innovations, expertise, and up-and-coming researchers.

This meeting was the perfect occasion for discussions among members of STELA and partners as well as for researchers and students to present the results of their research findings.

The CDC is proud to have been one of the main sponsors for this event, which was a sold out event with over 195 registered participants.
